

# AUTHOR INDEX

	PAGE
<i>Acton, L. W. and Culhane, J. L.</i> , A simplified thermal continuum function for the X-ray emission from coronal plasmas ... ..	141
<i>Allen, L. R., Herbison-Evans, D., Hanbury Brown, R. and Davis, D.</i> , A study of $\alpha$ Virginis with an intensity interferometer ... ..	161
<i>Antonopoulos, Gr A.</i> , Equilibrium solutions of the secular variations in the restricted three-body problem and their stability... ..	123
<i>Baylis, D. J.</i> , The use of world models with antipoles in deriving an upper bound for the cosmological density parameter ... ..	93
<i>Bell, R. A. and Branch, David</i> , An abundance analysis of the ultra-violet deficient subgiant HR 244 ... ..	289
<i>Bell, R. A. and Gottlieb, D. M.</i> , The calibration of narrow-band photometry—II. The gravity and Doppler-broadening velocity of G and K giants ... ..	449
<i>Branch, David and Bell, R.A.</i> , An abundance analysis of the ultra-violet deficient subgiant HR 244 ... ..	289
<i>Branson, N. J. B. A. and Hall, R. W.</i> , High resolution radio observations of the planet Venus at a wavelength of 6 cm ... ..	185
<i>Bartholomew, P.</i> , On the theory of stability of galaxies ... ..	333
<i>Clube, S. V. M. and Jones, D. H. P.</i> , The determination of statistical parallaxes ... ..	231
<i>Connon Smith, R.</i> , Effects of rotation in the colour-magnitude diagrams of Prasepe and the Hyades ... ..	463
<i>Culhane, J. L. and Acton, L. W.</i> , A simplified thermal continuum function for the X-ray emission from coronal plasmas ... ..	141
<i>Davis, J., Herbison-Evans, D., Hanbury Brown, R. and Allen, L. R.</i> , A study of $\alpha$ Virginis with an intensity interferometer ... ..	161
<i>Dixon, M. E.</i> , B-type stars within ten degrees of the galactic centre—I ... ..	87
<i>Donaldson, W. and Smith, H.</i> , The angular structure of the quasar 3C 147 ... ..	253
<i>Dormand, J. R. and Woolfson, M. M.</i> , The capture theory and planetary condensation ... ..	307
<i>Eggleton, Peter P.</i> , The evolution of low mass stars ... ..	351
<i>Forrester, David A.</i> , Some relativistic integral theorems ... ..	149
<i>Forrester, David A.</i> , A note on neutral stability against convection in general relativity ... ..	157
<i>Galley, S. J. and Williams, I. P.</i> , Planetary formation ... ..	207
<i>Gottlieb, D. M. and Bell, R. A.</i> , The calibration of narrow-band photometry—II. The gravity and Doppler-broadening velocity of G and K giants ... ..	449
<i>Gottesman, S. T. and Jager, G. de</i> , Studies of the neutral hydrogen content of the galaxies M31 and M 33—I (Summary). Published in <i>Memoirs</i> , Volume 74, Part 2 ... ..	485
<i>Gottesman, S. T.</i> , Studies of the neutral hydrogen content of the galaxies M 31 and M 33—II. (Summary). Published in <i>Memoirs</i> , Volume 74, Part 3. ... ..	485
<i>Grevesse, N., Nussbaumer, H. and Swings, J. P.</i> , [Fe I] lines: Their transition probabilities and occurrences in sunspots ... ..	239
<i>Haar, D. ter and Prentice, A. J. R.</i> , On the angular momentum problem in star formation ... ..	177
<i>Hall, R. W. and Branson, N. J. B. A.</i> , High resolution radio observations of the planet Venus at a wavelength of 6 cm ... ..	185
<i>Hanbury Brown, R., Herbison-Evans, D., Davis, J. and Allen, L. R.</i> , A study of $\alpha$ Virginis with an intensity interferometer ... ..	161
<i>Haslam, C. G. T. and Salter, C. J.</i> , Observations of some extended galactic radio sources ... ..	385
<i>Herbison-Evans, D., Hanbury Brown, R., Davis, J. and Allen, L. R.</i> , A study of $\alpha$ Virginis with an intensity interferometer ... ..	161
<i>Horedt, Gp.</i> , Gravitational instability of polytropic gas spheres under external pressure ... ..	81
<i>Jager, G. de</i> , Studies of the neutral hydrogen content of the galaxies M 31 and M 33—III. (Summary). Published in <i>Memoirs</i> , Volume 74, Part 4... ..	485
<i>Jones, D. H. P. and Clube, S. V. M.</i> , The determination of statistical parallaxes ... ..	231
<i>Lambert, D. L. and Mallia, E. A.</i> , Identification of NiH in the sunspot spectrum ... ..	437
<i>Large, M. I. and Vaughan, A. E.</i> , A search of the galactic plane for high dispersion pulsars ... ..	277
<i>Longair, M. S. and Scheuer, P. A. G.</i> , The luminosity-volume test for quasi-stellar objects... ..	45
<i>Longair, M. S. and Webster, A. S.</i> , The diffusion of relativistic electrons from infra-red sources and their X-ray emission ... ..	261
<i>Machay, Craig D.</i> , The orientation of radio sources and elliptical galaxies ... ..	421
<i>Mallia, E. A. and Lambert, D. L.</i> , Identification of NiH in the sunspot spectrum ... ..	437
<i>Monaghan, J. J. and Smart, N. C.</i> , Rapid differential rotation in white dwarfs ... ..	427
<i>Nussbaumer, H., Grevesse, N. and Swings, J. P.</i> , [Fe I] lines: Their transition probabilities and occurrences in sunspots ... ..	239
<i>Prentice, A. J. R. and Haar, D. ter</i> , On the angular momentum problem in star formation ... ..	177
<i>Przybylski, A.</i> , The RR Lyrae type star HD 16456 ... ..	197

## SUBJECT INDEX

### PAGE

#### Astrometry

The determination of statistical parallaxes, <i>S. V. M. Clube and D. H. P. Jones</i> ...	231
---	-----

#### Astrophysics

Gravitational instability of polytropic gas spheres under external pressure, <i>Gp. Horedt</i> ...	81
A simplified thermal continuum function of the X-ray emission from coronal plasmas, <i>J. L. Culhane and L. W. Acton</i> ...	141
On the angular momentum problem in star formation, <i>A. J. R. Prentice and D. ter Haar</i> ...	177
Planetary formation, <i>I. P. Williams and S. J. Galley</i> ...	207
Evidence concerning the complexity of the line formation problem in He I, <i>M. A. J. Snijders and Anne B. Underhill</i> ...	215
[Fe I] lines: Their transition probabilities and occurrences in sunspots, <i>N. Grevesse, H. Nussbaumer and J. P. Swings</i> ...	239
The diffusion of relativistic electrons from infra-red sources and their X-ray emission, <i>A. S. Webster and M. S. Longair</i> ...	261
The capture theory and planetary condensation, <i>J. R. Dormand and M. M. Wolfson</i> ...	307
Identification of NiH in the sunspot spectrum, <i>D. L. Lambert and E. A. Mallia</i> ...	437

#### Celestial mechanics

Equilibrium solutions of the secular variations in the restricted three-body problem and their stability, <i>Gr. A. Antonacopoulos</i> ...	123
--	-----

#### Galaxies

Radio observations of the cluster of galaxies in Coma Berenices—The 5C4 survey, <i>M. A. G. Willson</i> ...	I
On the theory of stability of galaxies, <i>P. Bartholomew</i> ...	333
Magellanic Cloud investigations—III. The LMC bar, <i>William G. Tift and Charles M. Snell</i> ...	365
The orientation of radio sources and elliptical galaxies, <i>Craig D. Mackay</i> ...	421
Studies of the neutral hydrogen content of the galaxies M 31 and M 33—I, <i>S. T. Gottesman and G. de Jager</i> , published in <i>Memoirs</i> , Volume 74, Part 2 (Summary) ...	485
Studies of the neutral hydrogen content of the galaxies M 31 and M 33—II, <i>S. T. Gottesman</i> , published in <i>Memoirs</i> , Volume 74, Part 3 (Summary) ...	485

Studies of the neutral hydrogen content of the galaxies M 31 and M 33—III, <i>G. de Jager</i> , published in <i>Memoirs</i> , Volume 74, Part 4 (Summary) ... ..	485
<b>Interstellar matter</b>	
Gravitational instability of polytropic gas spheres under external pressure, <i>Gp. Horedt</i> ...	81
On the angular momentum problem in star formation, <i>A. J. R. Prentice and D. ter Haar</i> ...	177
Radio maps of condensations in H II regions, <i>C. G. Wynn-Williams</i> ... ..	397
Studies of the neutral hydrogen content of the galaxies M 31 and M 33—I, <i>S. T. Gottesman and G. de Jager</i> , published in <i>Memoirs</i> , Volume 74, Part 2 (Summary) ... ..	485
Studies of the neutral hydrogen content of the galaxies M 31 and M 33—II, <i>S. T. Gottesman</i> , published in <i>Memoirs</i> , Volume 74, Part 3 (Summary) ... ..	485
Studies of the neutral hydrogen content of the galaxies M 31 and M 33—III, <i>G. de Jager</i> , published in <i>Memoirs</i> , Volume 74, Part 4 (Summary) ... ..	485
<b>Magellanic Clouds</b>	
Magellanic Cloud investigations—III. The LMC bar, <i>William G. Tifft and Charles M. Snell</i> ...	365
<b>Pulsars</b>	
A search of the galactic plane for high dispersion pulsars, <i>M. I. Large and A. E. Vaughan</i> ...	277
<b>Quasars</b>	
The luminosity-volume test for quasi-stellar objects, <i>M. S. Longair and P. A. G. Scheuer</i> ...	45
The angular structure of the quasar 3C 147, <i>W. Donaldson and H. Smith</i> ... ..	253
<b>Radio astronomy</b>	
Radio observations of the cluster of galaxies in Coma Berenices—The 5C4 survey, <i>M. A. G. Willson</i> ... ..	I
Distribution of brightness and polarization in Cassiopeia A at 5.0 GHz, <i>Ivan Rosenberg</i> ...	109
High resolution radio observations of the planet Venus at a wavelength of 6 cm, <i>R. W. Hall and N. J. B. A. Branson</i> ... ..	185
The angular structure of the quasar 3C 147, <i>W. Donaldson and H. Smith</i> ... ..	253
A search of the galactic plane for high dispersion pulsars, <i>M. I. Large and A. E. Vaughan</i> ...	277
Observations of some extended galactic radio sources, <i>C. G. T. Haslam and C. J. Salter</i> ...	385
Radio maps of condensations in H II regions, <i>C. G. Wynn-Williams</i> ... ..	397
Studies of the neutral hydrogen content of the galaxies M 31 and M 33—I, <i>S. T. Gottesman and G. de Jager</i> , published in <i>Memoirs</i> , Volume 74, Part 2 (Summary) ... ..	485
Studies of neutral hydrogen content of the galaxies M 31 and M 33—II, <i>S. T. Gottesman</i> , published in <i>Memoirs</i> , Volume 74, Part 3 (Summary) ... ..	485
Studies of the neutral hydrogen content of the galaxies M 31 and M 33—III, <i>G. de Jager</i> , published in <i>Memoirs</i> , Volume 74, Part 4 (Summary) ... ..	485
<b>Solar system</b>	
High resolution radio observations of the planet Venus at a wavelength of 6 cm, <i>R. W. Hall and N. J. B. A. Branson</i> ... ..	185
Planetary formation, <i>I. P. Williams and S. J. Galley</i> ... ..	207
Association of night sky H $\beta$ emission with the Cetus Arc radio region, <i>N. K. Reay</i> ...	307
The capture theory and planetary condensation, <i>J. R. Dormand and M. M. Woolfson</i> ...	307
<b>Stars—B-type</b>	
B-type stars within ten degrees of the galactic centre—I, <i>M. E. Dixon</i> ... ..	87
<b>Stars—binary</b>	
A study of $\alpha$ Virginis with an intensity interferometer, <i>D. Herbison-Evans, R. Hanbury Brown, J. Davis and L. R. Allen</i> ... ..	161
<b>Stars—giant</b>	
An abundance analysis of the ultra-violet deficient subgiant HR244, <i>David Branch and R. A. Bell</i> ... ..	289
The calibration of narrow-band photometry—II. The gravity and Doppler-broadening velocity of G and K giants, <i>R. A. Bell and D. M. Gottlieb</i> ... ..	449
<b>Stars—photometry of</b>	
A study of $\alpha$ Virginis with an intensity interferometer, <i>D. Herbison-Evans, R. Hanbury Brown, J. Davis and L. R. Allen</i> ... ..	161
The calibration of narrow-band photometry—II. The gravity and Doppler-broadening velocity of G and K giants, <i>R. A. Bell and D. M. Gottlieb</i> ... ..	449

**Stars—rotation of**

- Rapid differential rotation in white dwarfs, *N. C. Smart and J. J. Monaghan* ... 427
- Effects of rotation in the colour-magnitude diagrams of Praesepe and the Hyades, *R. Connon Smith* ... 463

**Stars—spectra of**

- An abundance analysis of the ultra-violet deficient subgiant HR 244, *David Branch and R. A. Bell* ... 289

**Stars—structure and evolution**

- Internal structure of upper main-sequence stars, *R. Stothers* ... 65
- Gravitational instability of polytropic gas spheres under external pressure, *Gp. Horedt* ... 81
- The masses of pulsating stars, *A. W. Rodgers* ... 133
- On the angular momentum problem in star formation, *A. J. R. Prentice and D. ter Haar* ... 177
- The evolution of low mass stars, *Peter P. Eggleton* ... 351

**Stars—variable**

- The masses of pulsating stars, *A. W. Rodgers* ... 133
- The RR Lyrae type star HD 16456, *A. Przybylski* ... 197

**Stars—white dwarfs**

- Rapid differential rotation in white dwarfs, *N. C. Smart and J. J. Monaghan* ... 427

**Structure of the Galaxy**

- B-type stars within ten degrees of the galactic centre—I, *M. E. Dixon* ... 87
- Observations of some extended galactic radio sources, *C. G. T. Haslam and C. J. Salter* ... 385

**Sun**

- A simplified thermal continuum function for the X-ray emission from coronal plasmas, *J. L. Culhane and L. W. Acton* ... 141
- [Fe I] lines: Their transition probabilities and occurrences in sunspots, *N. Grevesse, H. Nussbaumer and J. P. Swings* ... 239
- Identification of NiH in the sunspot spectrum, *D. L. Lambert and E. A. Mallia* ... 437

**Venus**

- High resolution radio observations of the planet Venus at a wavelength of 6 cm, *R. W. Hall and N. J. B. A. Branson* ... 185

**Universe—cosmology—relativity**

- The luminosity-volume test for quasi-stellar objects, *M. S. Longair and P. A. G. Scheuer* ... 45
- The use of world models with antipoles in deriving an upper bound for the cosmological density parameter, *D. J. Baylis* ... 109
- Some relativistic integral theorems, *David A. Forrester* ... 149
- A note on neutral stability against convection in general relativity, *David A. Forrester* ... 157
